WORK EXPERIENCE

Lennox India Technology Centre Pvt Ltd — Chennai, India
Associate Developer — Mar 2026 – Present

- **Engineered** enterprise Label Management applications using **Java, Spring Boot, React, TypeScript, and SQL**, delivering production features and backend enhancements across business workflows.
- **Eliminated dependency on external print services** by designing an asynchronous Spring AMQP (RabbitMQ) pipeline that routes print jobs directly to target printers.
- **Owned the engineering lifecycle end-to-end,** from technical discovery to deployment, through release staging, and post-launch monitoring, ensuring timely feature delivery.
- **Delivered 50+ customer-requested user stories** by working directly with US-based leads and business stakeholders in a lean Agile team.
- **Reduced production incidents by over 30%** by identifying root causes across file processing, RBAC, and backend integrations and deploying stable fixes.
- **Cut weekly Playwright regression runtime by 50% (26 → 13 minutes)** by refactoring test fixtures and parallelizing execution while expanding UI test coverage.
- **Supported a seamless enterprise platform migration with zero cutover downtime** by performing pre-launch regression testing, production-readiness activities, and post-release support.
- **Used GitHub Copilot Agents, custom workspace skills, and context indexing** to streamline unit testing, debugging, code reviews, and API documentation.

Graduate Engineer Trainee — Jul 2025 – Mar 2026

- **Developed** production features while transitioning from backend development to full stack with **Spring Boot, React, TypeScript, Java, and SQL**.
- **Automated** label validation across multiple environments using Java, reducing validation effort from **45 hours to 7 hours.**
- **Diagnosed and resolved 20+ production defects** by analyzing application behavior, logs, backend workflows, and integrations.

Student Intern — Feb 2025 – Jul 2025

- Applied **Java and Spring ecosystem technologies** including **Spring Boot, Spring MVC, Spring Security, JPA, Hibernate, JDBC, SQL, Maven, AOP, and ORM** in hands-on application development.

PROJECTS

Learning and Development (L&D) Management Application | Spring Boot, MVC, REST API, JWT Authentication

- Built a web-based Learning & Development platform for managing training programs and learning resources.
- Designed secured RESTful APIs with **JWT-based authentication** and role-based authorization.
- Developed the persistence layer using Spring Data JPA/Hibernate for managing application data.

GUIDESPHERE – Learning Material & Job Search Platform | Flask, Python, JavaScript, MongoDB, Node.js

- Built a full-stack application that enables students to discover learning materials and connect with potential employers.
- Implemented **content recommendation** using **Bag-of-Words and cosine-similarity**.
- Integrated MongoDB for application data and AJAX-based interactions for a responsive user experience.

EDUCATION

SDM College Of Engineering and Technology — Dharwad, India
Bachelor of Engineering (B.E.) Computer Science and Engineering — CGPA: 8.35 | Dec 2021 - May 2025

SKILLS

- Core Skills: DSA, OOPs, DBMS, Software Development & Testing
- Programming Languages: Java, TypeScript, JavaScript, Python, SQL, C
- Frameworks & Libraries: Spring Boot, React, Flask, Playwright
- Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, SSMS
